Mr Benoit Gauthier
Team-X – Technology Roadmapping & Planning, Airbus

Presentation Title: The good carbon

Benoit is an aerospace engineer who has embarked in a group-wide technology planning and road-mapping journey at Airbus CTO organization, within the newly created Team X, in charge of technology valuation and R&T portfolio optimization. Previously, Benoit has spent more than 15 years within Airbus Helicopters, occupying various management positions ranging from operations and support & services, commercial policy, industrial strategy and more recently at as Chief Financial and Compliance Officer at Eurocopter Saudi Arabia, Airbus Helicopters Chile & Cono Sur subsidiaries.

Since his EMBA studies at Cambridge University, UK, Benoit has been promoting the exponential enabling potential of carbon-based nanomaterials for uses in the aerospace industry and across various other sectors. With a focus on circular economy and positive climate impact, Benoit has co-founded the Smart Carbon Alliance aiming at lowering barriers for safe adoption of nanotechnologies and unleashing their full potential for a new industrial revolution.
